

EdgeVision — 30-Minute Runsheet

INTEL EVENT • DECK + LIVE DEMO • DRY-RUN

30:00 total
~20 min present • ~9 min demo • Q&A
Pattern AI Labs

One running clock for the full 30-minute slot — deck and demo stitched together. The **pink rows are the two demo hand-offs**: stop presenting slides and play the recorded clips from the demo script. Times are cumulative from the start; if you slip, trim Q&A, not the demo. Total lands at **30:00**.

0:00 0:30	OPEN	Slide 1 • Cover Welcome the room, one line on Pattern AI Labs. Set the frame: “~20 minutes, then your questions.”
0:30 2:00	THE PROBLEM	Slides 2–3 • The problem • Three blind spots Cameras record everything and tell you nothing. Name the three blind spots that cost money every day.
2:30 1:00	THE IDEA	Slide 4 • The idea “What if every camera could think?” That’s EdgeVision — the turn of the whole pitch.
3:30 1:00	HOW	Slide 5 • How it works Uses the cameras you already have, one small box on-site, switched on in days. Keep it light.
4:30 1:00	WHAT YOU GET	Slide 6 • Four outcomes The four things a manager will feel. Don’t over-explain — you’re about to show them.
5:30 0:30	RETAIL	Slide 7 • Retail — for your stores “Let’s see it running in a store.” This is your hand-off line into the demo.
6:00 5:00	► DEMO A	Switch to video • RetailTrack (Part A of the demo script) Play the 6 RetailTrack clips and narrate: people seen • manager screen • heat-map • best-customer • early alerts • recap. Runs ~4:20; leave slack for transitions.
11:00 1:00	QSR	Slides 13–14 • QSR — for your restaurants • The three numbers “Now the same thing in a restaurant.” Frame the three numbers every shift lives by, then hand to the demo.
12:00 4:30	► DEMO B	Switch to video • Fabric Lens (Part B of the demo script) Play the 5 Fabric Lens clips: reads the line • catches & fixes the mistake • two signals • the numbers • recap. Runs ~3:55; leave slack for transitions.
16:30 1:00	THE ENGINE	Slide 17 • Why it can do this: GenAI + VLMs The one ‘how is this possible’ slide. It understands scenes, it doesn’t just count.
17:30 1:00	WHY DIFFERENT	Slide 18 • Old cameras count, GenAI understands Sharp contrast slide. Land the difference in one breath.
18:30 1:30	THE MONEY	Slide 19 • Where it shows up in your P&L Tie it to their numbers — sales, labour, waste, safety. This is what the decision-maker remembers.

20:00 1:00	TRUST	Slide 20 · Private by design + Intel Nothing leaves the store; runs on Intel edge. Pre-empt the privacy question before it's asked.
21:00 0:45	PROOF	Slide 21 · Built by a team that's shipped this Quick credibility. Don't linger.
21:45 1:15	CLOSE	Slide 22 · The ask "See it live in your own store in three weeks." Make the ask, then stop talking.
23:00 6:00	Q&A	Open the floor Use the 'simple answers' sheet. Repeat each question so the room hears it. Park deep-dives for a 1:1.
29:00 1:00	WRAP	Restate the ask · hand the leave-behind One-line recap, hand out the 2-page handout, collect cards / book pilots. Buffer to 30:00.

WHAT YOU DELIBERATELY SKIP

- Retail use-case slides (8–12) and QSR use-case slides (15–16) are intentionally NOT clicked through — the live demo covers exactly that ground. Showing both would run you well past 30 minutes and repeat yourself.
- The VIP-moment slide (12) is your backup: if the best-customer clip stalls, jump to that slide and tell the story from it.

IF YOU CAN'T RUN THE DEMO

- Cut both demo blocks (saves ~9:30) and instead click through the retail slides 8–12 (~3:30) and QSR slides 14–16 (~2:30).
- That leaves ~3–4 extra minutes — spend it on the P&L slide and a longer Q&A. You still land inside 30 minutes.
