

EDGEVISION • RETAIL & QSR

Turn the cameras you already have into a **decision engine**.

EdgeVision is real-time AI that watches every store and restaurant camera — and tells your team exactly what to do, the moment it matters. It runs on-site on a small Intel appliance: no new cameras, no cloud, nothing leaves the building.

WHAT YOU GET

More sales

Convert more of the footfall you already pay for.

Better service

The right staff, in the right place, at the right moment.

Less loss

Catch shrink and mistakes as they happen — not weeks later.

Safer & cleaner

Hygiene and safety, checked continuously — audit-ready.

WHY IT'S DIFFERENT — GENAI

The breakthrough is the **Vision-Language Model** — an AI that looks at a camera frame the way a person would. It reads the whole scene and its context, not just pixels or motion. Old analytics counts; **EdgeVision understands** — and tells you what to do.

- Understands context — a real spill from a shadow, a browser from a buyer
- Judges quality — a missing item, a pale fry, an untidy display
- Adapts on its own — new store, new menu, new season, no re-training

● EDGE-FIRST ● PRIVACY BY DESIGN ● INTEL POWERED

IN YOUR STORES

Customers & Conversion • Footfall, dwell & hot-spots • Which displays pull people in • Browse-to-buy & queue drop-off • VIP & loyalty at the door	Staff & Service • Zone coverage at peak • Greeting & attentiveness • Who actually converts • Fitting-room & counter service	Loss & Safety • Tag-removal & concealment cues • After-hours / restricted motion • Slips, spills & blocked exits • Cash-desk ↔ door correlation	Store & Compliance • Display & shelf hygiene • Planogram / VM adherence • Opening & closing checks • Camera health & blind spots
--	--	--	---

IN YOUR RESTAURANTS

Speed & Throughput • Drive-thru wait per lane • Counter & kiosk queues • Time-to-first-bag • Kitchen bottlenecks, live	Order Accuracy • Item & modifier checks • Missing-item catch before bagging • Packaging accuracy • Remake & re-fire rate	Food Safety & Hygiene • Gloves, hairnets & aprons • Handwash cadence vs SOP • Hot / cold hold-time & temp • Spills & cleaning cadence	Guest & Ops • Dining-area & restroom checks • Greeter & upsell prompts • Labour vs demand by daypart • Closing-audit photo trail
---	---	--	---

PRIVATE BY DESIGN

Everything stays in your store. No faces or video leave the building, and it keeps working even if the internet drops. Runs on one small, efficient Intel appliance per site — with role-based access and a retention policy you control.

SEE IT LIVE IN THREE WEEKS

WEEK 1 Audit & install Site survey and camera audit. The edge appliance goes in on your LAN; baseline data starts.	WEEK 2 Calibrate & tune Zones and thresholds tuned to your store; alerts routed to the tools your team already uses.	WEEK 3 Handover & results Manager training and your first live results — on your own floor, on the cameras you already own.
--	--	---

Let's run a pilot in one of your locations.

Same cameras. New decisions. Zero risk to the rest of your estate.
